

Stay support for wooden windows - gap 4, axis 8,5 and rebate 15 mm

Description

Non-handed stay arm support for double ø34 mm hole drilling.

Application

For wooden doors/windows, gap 4 mm, axis 8,5 and rebate 15 mm.

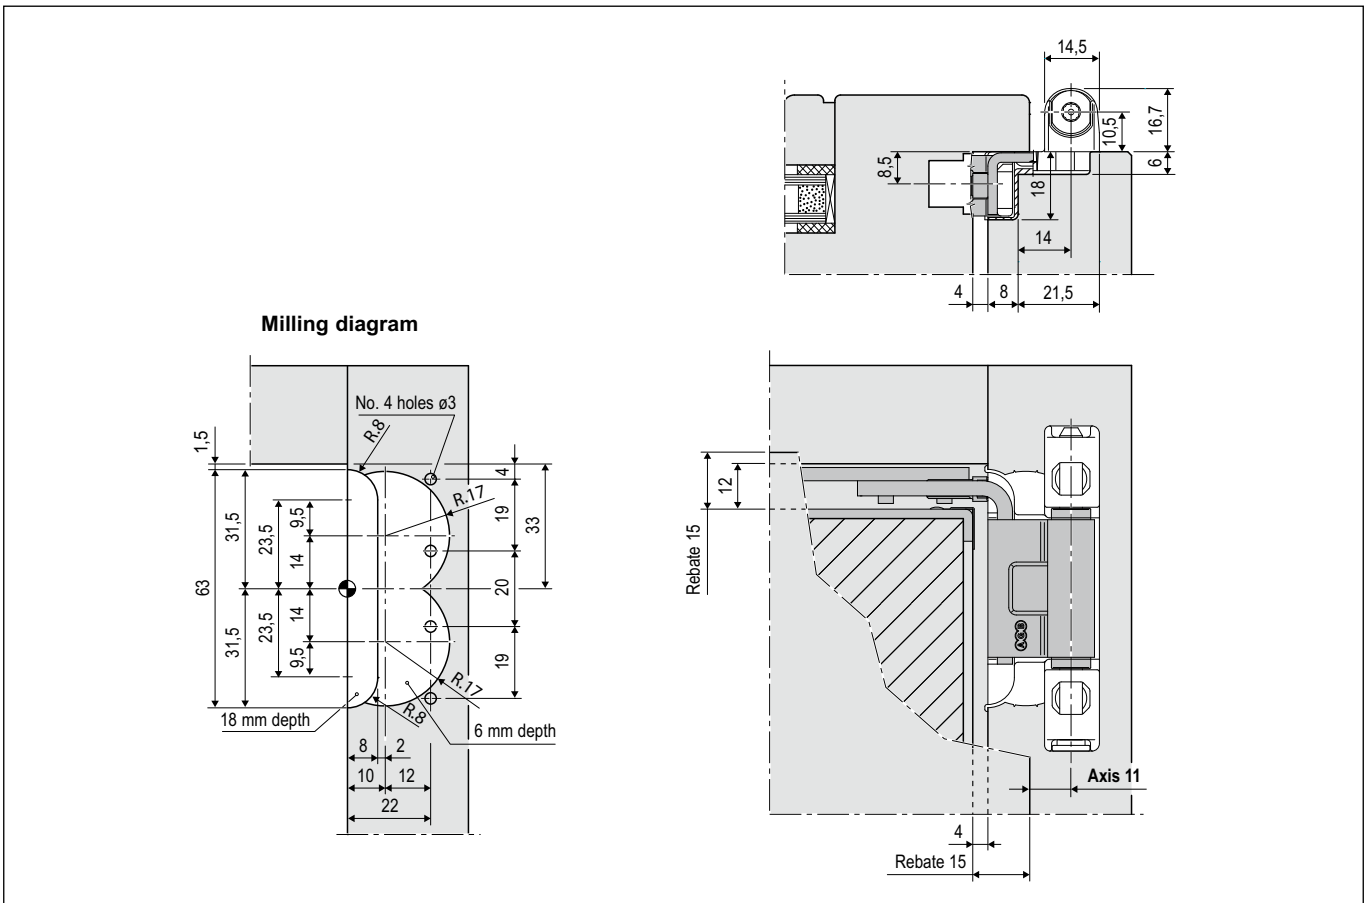

It must be used:

- on rectangular windows in combination with the stay;
 - in two sash systems, as stay hinge support for the semi-fixed sash.
- The hole position, symmetrical with the corner hinge, makes it possible to perform all milling and mounting operations directly on the jamb, even before assembling the frame.

Mounting

N° 4 4x40 mm screws.

NB. Use jig A52001.05.09 or A52001.06.09 for drilling the hole + filler A52001.08.04.
