

 **Adjustable - for Poseidon**

**Gap 12 mm for 16 mm faceplate locks**

Door type	Single or double-sash entrance or French doors.
Adjustment	± 1 mm laterally with 4 mm Allen wrench.
Assembly	Prepare milling for the striker on the gap 12 mm door, by using, eventually, special jigs; prepare milling for the pocket applied to the striker.
Material	Main part made of Zamak; double adjustable blade made of pressed steel; pocket made of plastic.
Mounting	Use 4x30 mm screws; inclined screw holes and covering plug for not required holes.
Application	Adjustable striker for Poseidon locks to be used on gap 12 mm doors, to be used in combination with Unitop/Sicurtop/Dual Poseidon locks and related extensions, 16 mm faceplate. Mount the striker on "4" side toward the opening direction of the door; in case the adjustment is not enough, mount the striker on "5" side.
